## HONORS WERE EVEN.

Visitors and Local Team Win One Game Apiece.—Good Attendance.

The basketball season opened at the high school building on Friday evening by a double game. Both the boys' and girls' teams came from Stevens Point on Friday and played the locals with the result that the local girls beat the visitors by a score of 38 to 0, while the local boys were beaten by a score of 20 to 18.

The game between the girls was all some sided so far as scoring was concerned and the visitors were considerably smaller than the home girls and also seemed to lack in practice.

With the boys, the visitors won the first half, but the locals braced up and played with such pluck and energy during the last half that they came near tying the score, and it was the general opinion that if they had a little longer to play that the locals would have won.

There was a large crowd in attendance, and as the expenses were light the game netted the association some thirty dollars. A program was also given during the evening and a very pleasant time was had.

## New Books.

## High School Entertainment.

The members of the high school have prepared an entertainment which they will present to the public on Friday evening, December 16, at the Lincoln building.

The first part will be taken up by a one act farce entitled "The Money Trap," and the second part will consist of gymnastic drills, choruses and instrumental and vocal solos.

The general admission will be 25 cents, children 15 cents. The entertainment commences at 7:30 o'clock and the public is cordially invited to attend.

## DEATH BY SUICIDE.

Former Rudolph Woman Drinks Carbolic Acid and Dies.

Mrs. Ferdinand Phillips of West Allis committed suicide at her home on Friday by drinking carbolic acid. The following from a Milwaukee paper tells of the deed:

"Despite frantic efforts of her son to thwart the fatal act, Mrs. Ferdinand Phillips, committed suicide at her home yesterday at noon by drinking carbolic acid. She was found in a chair talking with her son, Fred Phillips, Jr., when she reached to the table near her and lifted a vial of poison."

"Goodbye," she said. "I am going to die."

The young man rushed to his mother's side, but she had drunk the acid.

Mrs. Phillips was 53 years old and she leaves three children and her husband, who conducts a saloon at West Allis.

No cause has been assigned for the suicide.

The Phillips family formerly lived at Rudolph for a number of years, and were also well known in this city.

## "Music Hath Charms."

During the quarter ending December 31st, Mrs. E. P. Daly has made quite a remarkable showing in the sale of pianos and organs. She handles the Cable goods, which include also the popular Kingsbury and the strictly high grade Conover.

During the time mentioned she has sold instruments to the following parties:

Conover—Mary and Elizabeth Bevier, Charles Brooks, Ernest Eich, and Paul Schwartz.

Cables—Mary Olson, T. P. Peterson, L. Schuchel, M. Sharkey and A. G. Halgren.

Kingsburies—William Doe, H. C. Carpenter, and James Ray.

Organs—Henry Klein, John Katz, Wm. Hanke, Mary Guildenlopf, L. Kuch, Kirtie McKown, John Choppin, John Zigmund, John Hagerstrom, E. Kronholm, J. Worlund, Gay Howard, H. C. Douglas and Chas. Holke.

If you contemplate purchasing an instrument of this sort it would be well to see Mrs. Daly before you buy and she will talk the matter over with you and give a price that will undoubtedly please you.

## A Small Fire.

Fire was discovered in the stable of the east side engine house on Sunday, but before much headway had been made the flames were extinguished. The fire started in the hay in the loft, but how it originated, nobody knows. The damage done was very slight as there was not much hay in the barn and only a few small holes were burned thru the roof.

## Church Notice.

Services in the Congregational church next Sunday morning. The pastor will preach in the morning on "Temptations and How to Meet Them." In the evening on "Roots." All are cordially invited.

## KICKED BY A HORSE.

Charley Norton Has Exciting Experience at Sunday's Fire.

Charley Norton had a introp with one of the horses belonging to the city on Sunday, and to look at the horse and then at Charley, it is evident that the latter came out second best in the scrimmage.

The horse is all right, but Charley has a lump on his forehead about the size of a baseball, a scratch on his nose, one eye in mourning, a stiff neck and a very lame groin. Notwithstanding these drawbacks he has been greeting his numerous friends with what was once a sunny smile, but which, owing to the disfigurement of his countenance, is now more like the flinty grin of a confirmed hater of mankind.

It was this way. There was a fire at the stable of the west side engine house on Sunday, and when the alarm sounded, Charley hurried to the scene to render what assistance he could.

When he entered the barn it was full of smoke, and looking into the stables he discovered the horses were still there. He entered one of the stalls to take out the horse, but found that the halter had been taken off the animal.

He drove the horse out into the main building, taking the halter with him, but when he went to put it on the animal it wheeled about, swung and letting his heels fly, struck Charley in the groin.

He was thrown up against the wall by the force of the blow and landed on his head, causing the damages enumerated above.

Those who saw the kick that Charley got, say that he was very lucky to escape with as little damage as he did.

The fire did very little damage to the barn and the horse is all right.

Charley passed thru the Spanish American war without a scratch, the only inconvenience he ever experienced being when he used to own a stallion over one of the excellent army rations furnished by the war department, but since his discharge from there he has been mixed up in one railroad wreck, came near shooting an outlaw at the Hotel Anderson, and now his experience of Sunday.

We anxiously await the next chapter in his life, which should be something thrilling.

## A Touch of Winter.

The first real snowstorm of the season commenced on Saturday, the 10th inst., and continued in rather a hard manner until Sunday night, with several inches of snow on the ground. On Monday night mercury registered two degrees below zero, this being the coldest we have experienced this winter. Most of our citizens have been thankful for the mild weather up to date, as it has very materially reduced the fuel bill under what it was last year.

## Officers Elected.

At the meeting of St. Catharine's Guild at Mrs. Horkinson's on St. Catharine's day, occurred the annual election of officers for the ensuing year. Following officers being elected:

Pres.—Mrs. J. P. Witter.

## Wisconsin Sheep Take Prizes.

Competing against all the leading agricultural colleges of the northwest and professional breeders of western stock, the sheep exhibit of the agricultural college and the Wisconsin Experiment Station won more prizes at the Chicago stock show than all the other competitors combined. The Wisconsin sheep carried off prizes amounting in all to nearly \$400.

## A SMOOTH GRATER.

Man Took to Borrow Money on Another Man's Property.

# FOIBLES OF FASHION

**Fanciful Ideas in Muffs.**  
While flat muffs are more fashionable than the round variety the difference is not owing altogether to a preference for the flat, as the short-haired furs are made up in the first form, while the long haired are made into large round muffs.

Many of the flat muffs assume a rounded outline or even a tendency to a point at the lower part while the top are narrower and are often curved or indented.

Many of the season's muffs and neck pieces are designed for special costumes and not for general wear. In muffs fancy runs riot; on some of the fanciful ones to go with certain costumes. Not only is lace used, but passementerie, bands of embroidery, and contrasting furs are used to make them more elaborate, if less beautiful and artistic, than though the fur itself were all.

Furs are even dyed to match gown materials, and browns and grays in many different shades are shown.

**Autumn Calling Costume.**  
Here is an attractive calling gown, simple and in good taste. The ruffles are finished at the bottom with folds. The bands are of hand embroidered strips of the broadcloth of which the

gown is made. The vest-yoke and lower sleeves are of tucked liberty silk. The hat, with a soft roll and knot of velvet, is felt, both velvet and hat being of the new coque de roche shades.

**New Use for Lace Collar.**  
One of the latest ideas for the use of the already heavily handled lace collar is to make it, like charity, cover a multitude of sins in a loose negligee gown. For strict lounging purposes no one cares for a mass of frills and embroideries and lace streamers, but often one wishes to see an intimate friend without taking the trouble to change from a plain little negligee to one more elaborate. In such case be provided with a large, cape-shaped lace collar, ready to be slipped quickly on, and the transformation is complete.

A beautiful little house gown may be fashioned from flannel fabric, with a pale green ground, liberally sprinkled with small, set garlands or pink rosettes, just such a silk as one's grandmother may have worn. The bodice is made with a neck cut modestly round and with rather tightly fitting backs and fronts. The bodice is made in a simple, straight, and is piped in every conceivable seam with pale green velvet. The skirt is very full and very long, and about twelve inches above the hem has a quaint arrangement of velvet bows and ruchings that might have been copied from some old portrait or daguerrotype. The sleeves furnish the finishing touch to the quaint effect, uniting along the outer seam from the elbow down over green velvet buttons.

**Opera Glass Bags.**  
Heavy open lace made over satin linings into opera glass bags this year. They are white, as a rule, but can be made in colors, lining and lace to match. A plain square bag is drawn up at the neck with ribbons carried through embroidered rings set on the inside, then three of the bag fastened with a deep ruching of chiffon. A larger bag for carrying more of middy's trinkets is similarly made and set here and there on the outside with silver paillettes. So are other of the opera glass bags, which are carried by the mouth, or by a built-in handle of silver or gold. These bags are rounded at the lower corners, finished at the sides with dainty ribbon rosettes, and the ribbon handles are knotted. There may be paillette spangles or not, and of silver or gold.

**Black Taffeta Popular.**  
Black taffeta gowns are having a big vogue among women who make it a rule never to be without a black gown of some sort, even if they wear it but seldom. Black velvet is often and placed in trimming in cases where elaborateness is desired. One beautiful model recently shown had the entire lower portion of the skirt consist of a very full, flaring, fitted flounce of velvet. In other cases simple stitching is resorted to.

Another favorite trimming for taffetas is mousseline, for an indisputable charm exists in the combination of opaque materials with gauzes, chiffons and laces and it finds its perfection in their combination, which is, of course, intended only for dressy gowns.

Use of the new silvers is made up of taffeta puffs and cross folds of the silk an inch wide, having pleated ruffles on the edges. The effect is very full and the sleeve from the elbow down is completed by a long gauntlet of brocade, draped on, the bias and trimmed at the wrist with several quillings of Mousseline lace.

**Utilizing Old Laces.**  
A rapid and easy way of embroidering and one which enables a woman to use up odds and ends of old and new lace, especially in dora design,

is to cut the leaves from the net foundation and apply on a cotton, wool or silk gown. Work over the design, covering the figures well, with embroidered silk or mercerized cotton. The result is excellent. The embroidery stands out and the lace pattern answers the same purpose as a stamped design and in most cases is more attractive than the conventional patterns found in the shops.

A plain brown or green wallpaper makes an ideal background for pictures, and the absence of pattern on walls adds immensely to the apparent size of the room.

Conveniently near the range in the kitchen should be placed the sink and the dresser, not too far from the table and range. You have then the principal articles so placed that the labor will be much lightened.

To save the knees of boys' ribbed stockings another reinforcement may be sewing a piece of strong black cloth behind them before they are worn at all. It is remarkable how much longer stockings wear when treated in this way.

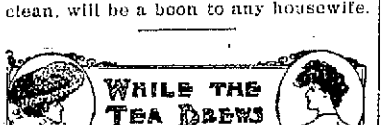

Polished iron work can be preserved from rust by a mixture of turpentine and oil varnish mixed with as much olive oil as will give it a degree of greenness, and afterward adding to this mixture as much spirit of turpentine as of varnish.

**Plaited Skirt in Style.**  
The plaited skirt is one of the set-off fashions for the coming season. Skirts must be full, but they must not be bulky about the hips. By plaited skirts in meant the several varieties that are used for the lighter fabrics. The most graceful for walking just above the ground. Drop skirts are still worn, although a few frills are made up with the lined breadths.

According to sun plaiting lace none of their popularity and skirts made of black velvet crepe de chine, gauzes and nets will be much worn with the fancy laces and velvet coats. A canvas model of black crepe de chine to be worn with a black velvet coat and an embroidered waistcoat is plaited in gorges, the plaited gorges alternating with others plain to the knee, where they fall into plaittings.

**New Fur Garmets.**  
One of the newest fur garments is more like a duster than anything else attached to a velvet belt. The sleeves are smooth over the shoulder, extending to considerable width below the elbow. One of the latest furs is white ermine, known as the "white ermine" coat, but more often into neck pieces and muffs. There is the same infinite variety in neck pieces and everything is found in them from huge stoles which envelope the shoulders to pieces of fur that are a little larger than a four-in-hand tie.

Over this place a simply embroidered or woven lining, carefully fitted, supplied with pockets, and caught to the basket so that it can be removed to be laundered. Into the bottom set a heavy pin and needle cushion, also covered with a washable linen cover. The basket, edged and so easily kept clean, will be a boon to any housewife.

**While the Tea Brews.**  
Fluffy tailored skirts are the most striking departure from the old-fashioned pale colored gloves are worn as frequently as white ones.

For the knockabout suit there is nothing like good corduroy. Long gloves with wrinkled tops are worn with the elbow sleeves. White jet is used with beautiful effect on some of the white gowns. With the silk dressy gown a cockade of silk to match is worn in the hair.

Velvet flowers in lovely shaded colors are used on some of the best hats.

Shoulders are spreading out to a prodigious and most unlovely width. New, ostrich plumes show the light color at the stem, deepening toward the tip.

One plaited length of ribbon looks like a cross between a cockade and a pom-pom.

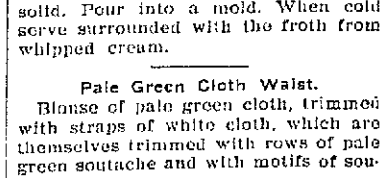

**Colors in English Velvet.**  
Lovelier than ever in coloring, and of superlative quality, English velvet appears among winter fabrics. It is shown in Malmesbury red, mignon-

ette green, and in clove and a purplish blue. There is a doves wing lawn and a realistic mushroom, a Japanese blue—that we should call green—and gray and white and cream.

**Apple Pudding.**  
Butter a deep pudding dish and sprinkle with bread crumbs; line the sides of a dish with a rich pie crust and put a narrow strip around the bottom, so as to leave the center of the bottom uncovered; next fill the dish with finely cut apples with some sugar sprinkled between them; add a very little nutmeg, a pinch of cinnamon and a little butter in small pieces; cover with the same crust and bake an hour when done turn the pudding out on to a dish and serve with hard sauce.

**Raspberry Bavarian Cream.**  
Sift a quarter of a package of gelatin in half a cup of raspberry juice; dissolve over hot water; add the juice of half a lemon, a cupful of raspberry juice and half a cup of sugar; stir over ice water, and when it begins to "set" fold in a cupful and a half of double cream beaten solid. Pour into a mold. When cold, serve surrounded with the froth from whipped cream.

**Pale Green Cloth Waist.**  
Blouse of pale green cloth, trimmed with straps of white cloth, which are themselves trimmed with rows of pale green soutache and with motifs of soutache.

tache and blue velvet. The waistcoat is of white cloth, ornamented with little gold buttons.

The full sleeves are finished with bands of white cloth, trimmed with motifs of the soutache and velvet, which form loose cuffs over tight under cuffs of white cloth, ornamented with gold buttons. The tucked collar is of white, with a turn-over of blue velvet.

**Voile Over White Silk.**  
One of the prettiest white dresses seen recently was of loosely woven voile mounted over white silk. The skirt had a straight front apron bordered by a deep flange plain, as it is called, the waist about the hips and in the back small knife plaits stitched down for a few inches. Bordered the apron and continuing about the hem of the gown is a zigzag black pattern done in white moiré braid about a third of an inch wide. The blouse bolero has the same trimming about the shoulders and the hem of the blouse. The bolero opens in front to show a blouse of Japanese line embroidery in blue. The revers are edged with ruffles of Valenciennes lace, the sleeves are slightly short and finished with a cuff of the embroidery and from it falls a full fall of lace.

**Ornaments for the Hair.**  
Ornaments for the hair are so varied as to be worth a volume of description. One very pretty hair decoration consisted of two white tips, tied together with a big bow of white tulle, upon which were sewed the smallest of beads in gold and steel. The whole was fastened upon a hairpin so that it could be stuck into the hair.

A still prettier ornament, being more effective, was a feather of pink. It was a catfish feather, about eight inches long, very thick and curled at the tip to under a heavy head. At the base of this feather there was a pink bow of chiffon studded with pearl beads. The feather was fastened upon a long hairpin, which was designed to sink low into the hair.

**Shading in Colors.**  
Beautifully tinted flower sets, muffs and long round bon, appear this year in the shaded effects which are to be found in so many things. There is the popular heliotrope, shading to palest lavender, and to go with another popular shade of the season—brown—the feather graduates from a rich dark tone to a delicate cream. They are charming.

**Batter for Pineapple Fritters.**  
Beat one egg without separating the white and yolk. Add half a cup of flour and one-fourth of a teaspoon of salt, and beat with a spoon until perfectly smooth. Then beat in one-fourth of a cup of milk.

**Now, What Did He Mean?**  
"It's terribly slow here," wrote the war correspondent to his wife. "I have actually seen any fighting since I left home."

**Fireflies as Jewels.**  
Two or three fireflies placed in the center of a room will shed a soft light all over it. They are very common in Havana, Brazil, Venezuela and Mexico. In those countries at night the natives affix the little creatures to their shoes and thus obtain light to see the road and frighten away the snakes. Mexican women use them as jewelry. They tie them in little gauze bags and put them in their hair or on their clothing.—Liverpool, (Eng.) Mercury.

**President Fillmore's Secretary.**  
Major Austin S. Cushman, who was private secretary to President Millard Fillmore, is at present living in New Bedford, Mass. He was the first photographer ever employed to assist a chief executive of the United States.

**Woman Professor of Botany.**  
Miss Minnie Robinson of Detroit, a graduate of Michigan university, is winning national honors as a student of botany. For some time she has been professor of botany and biology in Vassar college.

**Marriage Goes with Office.**  
President Dillon of the North Missouri Press association accepted the presidency of that organization with the understanding that he would get married before his term ended.

**Ashland Banker Is Alive.**  
S. M. Hay, a well-known Ashland banker, who was reported to be dead, is alive and in his usual health.

**To Study Legislation.**  
A new course of study will be offered at the University of Wisconsin by Prof. Reinsch in the theory and practice of legislation.

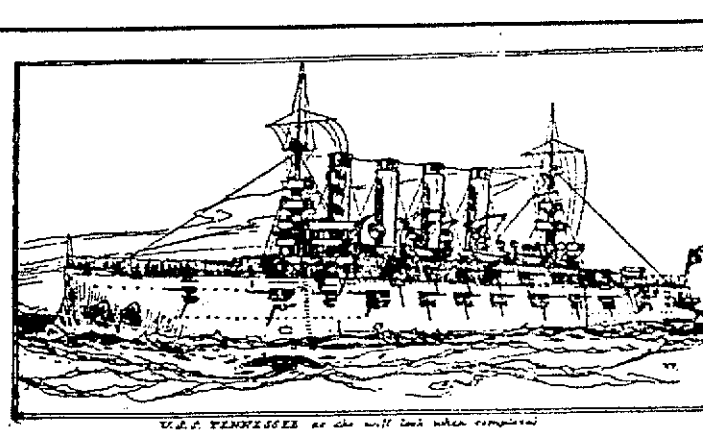

**Deny Murder of Trump.**  
The reported murder of Dan Trump in New Mexico is denied at Portage by men who say they saw Trump at Kilbourn.

**Pastor Makes a Change.**  
The Rev. James Blake, pastor of the Plainfield Baptist church, has resigned to accept a charge in Stevens Point.

**Increases Kenosha Taxes.**  
The Kenosha council has decided to increase the taxes of the city, the levy being placed at 13 mills. Last year it was 11 mills.

**To Honorize Bakers.**  
The Kenosha council has decided to honorize bakers. The levy being placed at 13 mills. Last year it was 11 mills.

## ARMORED CRUISER TENNESSEE LAUNCHED AT PHILADELPHIA

U.S.S. TENNESSEE at the ways last week completed.

The armored cruiser Tennessee was launched Dec. 3, at the yards of William Cramp & Sons, Philadelphia. The christening party included Gov. Frazier of Tennessee and his staff, Mrs. Frazier and their daughter, Annie Keith Frazier, who was sponsor for the ship.

Up to almost the moment when the big warship started down the ways, a drizzle of sleet and rain fell continuously, but during the actual launching the sun shone through the clouds, the sky again becoming overcast shortly after the ship took the water.

Miss Frazier carried a huge bouquet of American Beauty roses to which was attached a bottle of champagne, and as the vessel was about to take its initial dip she struck the prow two resounding blows at the same time pronouncing the baptismal words in a clear voice.

Immediately after the launch luncheon was served in the mould loft. The Tennessee was completely five months ahead of the contract time.

Gov. Frazier's party included Mrs. Frazier, Senator and Mrs. E. W. Car-

roll. Miss Annie K. Frazier, who christened the battleship Tennessee, is the daughter of the governor of Tennessee and is noted for her beauty.

**Science Aiding Agriculture.**  
The achievements of college professors in showing an industry of modest standing but fundamental importance how to enhance its production have reached monumental results. An Iowa professor, by inducing the farmers to make a scientific selection of seed and teaching them a more careful preparation of the ground, enlarged the corn crop of that state by about 400,000 bushels. A Maine professor is showing how, by selection in breeding, hens can be induced to lay twice as many eggs as the ordinary fowls. Cornell professors are enlarging the old lesson on the increase of milk from cows. A Minnesota teacher has developed a harder and improved breed of wheat. A Nebraska in the same line has outlined a plan of cultivation that will secure crops on semiarid land without irrigation.—Pittsburg Dispatch.

**Celluloid a Menace.**  
The unrestricted sale of articles made of celluloid, which is practically gun cotton, for any purpose whereby such article is liable to come into contact with fire, should on no account be allowed, says the Lancet. We believe there are other dangerous substances related to gun cotton which go under other names and which are also used for similar purposes and should be likewise banned.

**University Men in Legislature.**  
The Wisconsin legislature that convenes next January will have among its members ten men who held degrees from the University of Wisconsin. Graduates of the university, while not preponderating in membership in the legislature, will have considerable influence in formulating laws. Of the ten members the senate has five and the assembly the same number. This means that 5 per cent of the assembly are graduates of the University of Wisconsin.

**Morgan Protects His Photos.**  
Following the lead of John D. Rockefeller, J. P. Morgan has had a photo of his recent portrait in oil copyrighted so that the newspapers throughout the country will not be able to print it. So far as is known Mr. Rockefeller and Mr. Morgan are the only two Americans of the sterner sex who object to having their pictures reproduced in the newspapers. There are a number of society women who forbid the photographers to give pictures for publication and some of them have had their photos copyrighted.

**Aged and Enthusiastic Hunter.**  
Dr. Stephen Call of Ingalls, Okla., is about 80 years old, but he spends his winters in the woods combing. His friends declare he is the oldest and greatest coon hunter alive. About "time that coons are ripe" the old doctor arranges his spring traps, loads his gun and gets the coons together and pulls for the tall timber in the creek country. He often goes out alone for a hunt in the fall and does not return until the following spring.—Chicago Chronicle.

**Woman and the Divorce Court.**  
The current discussion of divorce and the need of national legislation on the subject recalls Susan B. Anthony's remark, made several years ago. "The divorce court," said she, "is to the American woman what Isis was to the fugitive slave in years gone by."

**English Physician Has New Treatment for Failing Sight.**  
Optimists believe that Dr. Stephen Smith, surgeon of the eye department of Battersea Park hospital, Nottingham, England, has discovered a new treatment of the eye which will practically abolish spectacles. It is styled "manipulation of the eye" and is gentle and gradual, occupying a few minutes daily, raising the eye and having no injurious effect of any sort. Some cases are cured in a week, and in all cases improvement is rapid.

Thirty patients who had been obliged to wear spectacles for a long time have so far been treated by Dr. Smith and, with a single exception, all have discarded glasses and can now read at either long or short distances, as well as people who have never needed assistance.

The cure of myopia, hypermetropia and astigmatism are said to be permanent.—Philadelphia Telegraph.

**Value of New Ideas.**  
The recognition of the value of a new idea, in regard to a business point, is leading employers to encourage criticisms and suggestions from employees in respect to the details of the business, thus utilizing their microscopic view rather than depending solely on the bird's-eye view which is taken by the manager, says Success. A friendly feeling results from this attitude, and the employer takes a deeper interest in his work, developing his own capacity and helping the by his suggestions put new life into his work and adds new enthusiasm to his efforts. He will work harder to develop another point, and so win this appreciation than he would for any other compensation.

**To Learn American Methods.**  
Following the custom of the house of Rothschild of sending his sons abroad to study American business methods, two sons of the Vienna branch of the family of themselves have arrived in this country. They are Baron Alphonse and Baron Louis De Rothschild, son of Baron Albert De Rothschild of Vienna. Baron Alphonse has come to study American business methods, and during his stay he will complete his education in banking under the direction of August Belmont in the New York banking house of August Belmont & Co. This is said to be the first time that a member of the Rothschild family has been sent to this country to perfect himself in financing.

**Governor's Head Not Swelled.**  
B. B. Brooks, just elected governor of Wyoming, is a big ranch owner and a great lover of outdoor sports. In reply to a letter of congratulations from a friend he says: "If I could hire some decent fellow to take this governorship job off my hands for a couple of years I would do it. Couldn't do it, I don't think. I've ever wanted the job, but I don't think I ever wanted it. When the frills and dildos get too thick I will telegraph you and we will speak off to the ranch and go back into the mountains, put up a tent and I will smoke a cornucopia again, fry the grouse and make the best of it and we will lazy around and laugh at the world as we used to do."

**Master of "Hot Air."**  
Frank Russell, secretary of the St. Joseph and Grand Island railroad, with headquarters at St. Joseph, Mo., received a letter recently from a young man who wanted a pass. Before replying the secretary asked the young man what was a "hot air" pass. "It is," said Russell, "his good work" and "his bright future." In answering the note the railroad man said: "Dear Sir: I wish you would give me the address of the man who built your furnace. We have been thinking of heating our right of way between St. Joseph and Kansas City this winter and I believe the man who furnished your hot air machine could do the pass. You earned it."

**Barbecue at Sugar Factory.**  
On Dec. 22 the management of the Rock County Sugar company has invited all the farmers in Rock county to a barbecue at their factory in Janesville. The factory will be thrown open to the public and the farmers will be shown the benefits of the best sugar industry in Wisconsin.

**Renew Wedding Troth.**  
Mr. and Mrs. Benjamin Grove of Janesville celebrated their golden wedding Monday night. Mr. Grove is 74 and his wife is 71 years old.

**Dies Rather Than Suffer.**  
Miles Thelen, aged 40 years, an old resident of Marinette, committed suicide by hanging at Nathan, Mich. His jaw was badly fractured recently in an accident, and he had to be fed through a tube. Slow recovery caused despondency, which resulted in the suicide.

### Overwork Killing Us

In the Great Struggle for Wealth and Position We Are Becoming Weaker Than Our Forefathers.

By the cares of business and social life we use up or waste away the most vital elements of the human body before we realize our weak and run down condition. It is only by a quiet attention to the symptoms, which commence with a queer, low, drowsy sensation in the head, later the power to concentrate the thoughts, an inability to retain workers, in fact, following this will come deficient sight or blurred vision, muscular weakness and a dull pain in the small of the back. There is a tendency in the early stages of the disease to become irritable; the temper fringes; the appetite depressed, leading to complete lack of confidence and a general feeling of disgust at our own weakness. When the blood and nerve forces have been wanted by disease, overwork, worry, headache, high blood, indigestion or other bad habits, Dr. Chase's Blood and Nerve Food rebuilds the system by replacing the same substances that have been lost. Price 50 cents.

### Stockholders Meeting

The stockholders of the Electric & Water company held their annual meeting at the city hall on Tuesday evening. Upon calling the roll, a majority of the stock was found to be represented by those present. Secretary Wipperfurth reported that it was impossible for the officers to submit the annual report at that time and that at least two days more would be necessary before the same could be ready. This being the case, it was proposed that the meeting be adjourned until such time as the officers would be ready to submit their report. Upon a motion to this effect being made, an adjournment was taken until next Friday evening, when the regular business of the company will be taken up.

### TAKES CARBOLIC ACID.

Mrs. Ed. Daly Commits Suicide by Swallowing Poison.

Mrs. Edward Daly died this morning from the effects of a dose of carbolic acid, administered by her own hand, supposed to have been with suicidal intent. No cause can be given for the deed as she lost consciousness soon after committing the rash act, and did not regain consciousness until the end came.

Mrs. Daly took the poison some time after midnight last night. Mr. Daly and some visitors at the home and retired for the night and Mr. Daly was partially asleep when he was awakened by a noise in the next room. Going to investigate the matter he found his wife trying to get out of the door. She asked Mr. Daly some question about the door being locked and almost immediately fell to the floor unconscious.

Medical aid was summoned at once, but it was found impossible to do anything for her and she continued unconscious in spite of all that could be done until she passed away shortly before noon today.

The deceased was 21 years of age and will be buried here, the time of the funeral has not been set at this writing.

H. W. Lord and M. H. Robinson have each received one enclosed wagon for their respective mail routes. They are nicely painted up and arranged on the interior so as to be very handy for the purpose intended and they make a very nice appearance.

### Are Afraid of the Law.

It looks very much as if Gov. La Follette and his followers were afraid of the primary election law. At least the governor's friends claim that the law does not apply to the nomination of a United States Senator. It seems that the law does not go into effect yet. They do not state just when it will go into use, but sometime in the future. Now you want to see the law tried, and can see no reason why the governor should object to it, even the he may be a candidate himself. If the governor wants to be a senator, and the people would rather he were a senator than a governor, we say, give him the job by all means. The majority should rule, and there might be some expression from the people if the candidates were put into the field by means of the primary election law. It may be that the governor does not think he would be doing just the thing to turn about and ask the people to place him in another political job right after he had just got thru from asking the same thing of them. It would certainly look a little queer, and he might have to start that campaign all over again. Let us put the primary election law into practice as soon as possible and use it to nominate a United States senator the very first thing. If it is a good thing for the other fellow it ought to be a good thing for La Follette as well. There is nothing like making a man take his own medicine.

### A Long Winded Candle.

The large candle in Kruger & Warner's window burned out on Tuesday, having burned for one hundred and twenty-two hours and thirty-one minutes. Fred Vollette was the nearest guesser on the life of the candle, his estimate being only one minute off. There were some twelve hundred guesses on the candle and they varied all the way from two hours to ninety days.

### Reception for Rev. Staff.

The members and friends of the Congregational church held a reception on Tuesday evening for Rev. and Mrs. Staff at the church parlors. There was a large crowd in attendance and a very pleasant evening was held. A musical program had been prepared for the occasion, and there were refreshments served, making out an evening that was greatly enjoyed by those present.

### New Primary Election Law.

The process of voting at the primary under the proposed law is a very simple one, and this may be the first time that process has ever been explained to you. The proposed law provides that when you enter the voting booth on primary election day the clerk will hand you as many ballots as there are parties, viz: Republican, Democratic, Prohibition, Socialist, and Independent—five in this case. On each ballot is printed the names of all the candidates for a place on the ticket in the fall election—the Republican candidate on one ballot, the Democratic on another, and so on; take all of these tickets with you and step into the voting compartment and there by yourself select the ticket of your party. You cannot vote for candidates on more than one ticket. This provision is to keep voters from meddling with the nominations of a party to which they do not belong. The next step is to make a mark opposite the name of each man you wish to run as a candidate of your party. You then fold the ticket that you have marked, and also fold the other tickets in the same manner. Stepping out you hand the ticket that you wish to vote to the ballot inspector, and it is deposited in the ballot box. The other four tickets you hand to another clerk, who deposits them in another box—and the contents of this box are burned as soon as the primary polls are closed. Every man has thus voted directly for the man he wishes to see on his party ticket, and no other man can know how he has voted.—Madison Journal.

### Death of Chas. Pehrling.

John Carl Pehrling died on Sunday afternoon, the immediate cause of death being nemic poison. Mr. Pehrling sustained a fall from the roof of his shed several days before while engaged in repairing the chimney, and received such severe injuries that it was impossible to save his life. He was 45 years of age and leaves a wife and one son. The funeral occurred on Wednesday from the German Lutheran church.

It has been found that gold coin loses one-third second of its weight by abrasion, simply in making a shipment to Europe. That is, in shipping over one million dollars, the loss would be \$30,000 or more. In view of this fact we advise all our readers to carry their gold coin carefully wrapped up in huckskin. This idea of losing \$30,000 every time you take a million dollars out on a three thousand mile journey is a serious matter.

—Beautiful designed gift metal frames sold under a strong guarantee, that they will never tarnish at Menzel's studio.

Martin Pyl of Arpa in the city on Saturday and favored the Tribune office with a pleasant call. Mr. Pyl reports that an effort is being made to have the postoffice removed to his place, and that the Northwestern Railway company has promised to remove their depot to the crossing opposite his place provided the change is made. It seems that a large number of the settlers in that locality have signified their desire to have the postoffice removed.

Congressman Babcock again thinks the tariff should be revised. When a man comes as near defeat as "Bab" was at the recent election it generally sets him to thinking. He thought the same thing several years ago and made quite a stir about the matter, but thinking what should be done here in Wisconsin and doing it in Washington are two different things. "Bab" will probably have another guess coming before he actually alters the tariff.

Mr. and Mrs. T. E. Nash have returned from their trip to Italy. They report a very pleasant journey and a good time during their absence. When they came back T. E. presented his brother, L. M. Nash, of this city with a handsome cane that he had secured for him across the water. Larry sized the cane up carefully, and pronounced it a very nice gift, but said he expected it would be about thirty years before he would need a cane to any extent. This is the proper spirit for a man to have who has passed the half century mark.

REMARKABLE CURES  
DR. J. C. SCHWANK'S

By Per-erna.  
Under date of January 10, 1887 Dr.  
Hartman received the following letter:

"My wife has been a sufferer from a complication of diseases for the last twenty-five years. Her case has baffled the most eminent of the most noted physicians. One of her worst troubles was chronic constipation of several years standing. She has suffered through that most critical period in the life of a woman, change

Mrs. Alva Schwartz, Sanborn, Minn.  
wrote:

"I have been troubled with rheumatism and sciatica for twenty-five years. Could not sleep day or night. After using your medicine I can sleep and nothing bothers me now. If ever afflicted with any kind of sickness, I would use your medicine I shall use it. My son was cured of sciatica of the larynx by Per-erna." Mrs. Alva Schwartz.

"In June, 1896, I wrote to you about my case. You advised a course of treatment called 'Masturbation,' which we commenced, and have to say it completely cured her.

"About the same time I wrote you about my own case of catarrh, which was cured by the same treatment. I stand firm. At times I was almost fast going

commenced to use Perunn according to your instructions and continued its use until the pain was completely cured. I am completely cured now. Your remedies do it that you claim for them, and even more.

In a letter dated January 1, 1900, Mr. Atkinson says, after five years' experience with Perunn:

*I will ever continue to use Perunn as long as I live, and I will, cured of my rheumatism, recommend it to all my friends.*

is a corporation capitalized at only one million dollars, owns twenty-three claims, forming three rays in San Bernardino County, California, each claim being 3,560 feet in length by 800 feet in width. Five of these claims would warrant a capitalization of \$500,000, but we have put in the whole two and a half million. We have a mineral of low grade—our output is three million pounds of low grade lead. The largest dividend payers in the world have and are low grade miners. Low grade properties

men found, because of the huge hoards in which they are found, the small cost of mining, and the easy and uniformity of production. We should get at \$5 per ton on every ton mined, by the most conservative estimate. We are about to start a forty percent, handling over 250 tons a day, mining all year. This mill alone will yield from 10 to 20 on the net value of the stock, and a total will be based on each group of mines.

...writes and says of the low grade mine: "The ore in a vast body on the east side of 'Gold Ridge' and vertical exposure of more than one hundred feet is a reserve deposit of ore." There are few mines surrounded by such favorable conditions as this here." "If this large ore body even holds its own standing downward, it must, according to the assay, be of great value to its owners."

Hewitt concludes his report with the significant statement that "ore bodies usually increase in value with the increase in the size of the body."

...of this property, the above varying requirements of \$25,000 to over \$50,000. We have time and 152 feet through a well bed of ore.

J. Bailey, Mine Engineer, who also has reported the following details: "The ore which has been used by the State Chemist of California, in a solution test, being the best gold-bearing ore known. It is a weak body and can be easily powdered." "There is enough IN SILICA and TIN TO BE USED to keep a large capacity running for a lifetime."
